Message From the President

July 4th, 2013

The calendar shows July, but the water still seems like early June. Evidence of the Gulf Stream moving in the wrong direction abound, with Giant Turtles and Portuguese Man of War sightings, but still no warm water.

We had days of on-shore wind driven surf last week, so sure all the beaches were very busy keeping everyone safe. We had a number of rescues at RM4, and our new beach staffing, with the most senior and most junior lifeguards now combined, proved quite capable with some difficult rescues in large surf, cold water and fog.

Congratulations to the Class of 2013! All 100+ new lifeguards are now working and hopefully enjoying their new jobs and perhaps new careers.
