JBLC Message From the Presider July 4th, 2013

The calendar shows July, but the water still seem early June. Evidence of the Gulf Stream moving direction abound, with Giant Turtles and Portugu War sighting, but still no warm water.

We had days of on-shore wind driven surf last we sure all the beaches were very busy keeping eve We had a number of rescues at RM4, and our ne beach staffing, with the most senior and most ju now combined, proved quite capable with some large surf, cold water and fog.

Congratulations to the Class of 2013! All 100+ r lifeguards are now working and hopefully enjoying jobs and perhaps new careers.
